

# Help us find the cheetahs of Zimbabwe!

We would like to know where cheetahs occur in Zimbabwe. This knowledge will help us to improve the conservation strategy of the cheetah.

## You can help us with:

### Sightings

If you have seen a cheetah please let us know, and where possible note:

- **(GPS) Location:** a GPS position and/or description of the location where you saw cheetah,
- **Date & Time:** the date and time at which you saw cheetah,
- **Number:** the number of adult male and/or female cheetah, the number of cubs,
- **Size of cubs:** the size of the cubs defined as; small /  $\frac{1}{2}$  adult size / adult size,
- **Distinguishing marks:** marks that might help to identify the cheetah, e.g. a scar or ear notch.

### Pictures

Your (historical) pictures will help us to identify the cheetah according to their coat pattern. The best ID pictures are (historical) pictures of the **left and right side** of the animal at a 90 degrees angle like the picture in this poster, any other pictures are welcome too though.

Send your (historical) sightings and/or pictures to
